ARMORBOSS™ BUS SNEEZE GUARD (ABB) BRINGING PEACE OF MIND TO PUBLIC TRANSIT

Everyone deserves to feel safe while riding the school bus, including the driver. That's why PS Public Protection™ specifically developed ArmorBoss™ Bus Sneeze Guards to provide protection and peace of mind in this critical component of public transportation. Not your everyday sneeze guard, these purpose-built sneeze guards serve as a protective barrier that limits the transmission of germs between the driver and passengers. Constructed from clear acrylic plastic for easy cleaning in between routes, the ArmorBoss Bus Sneeze Guard allows the driver to stay safely separated from passengers while maintaining a clear view of the bus's interior.

- **Limits the transmission of germs between driver and passengers** – The ArmorBoss Bus Sneeze Guard blocks the germs that result from sneezing and coughing, inhibiting their transmission between the driver and passengers throughout the bus
- **Made from durable, clear acrylic plastic** – Stands up to years of use and is easy to keep clean
- **Adjustable to fit a variety of interiors** – The sneeze guard can be quickly adjusted from heights of 68" to 78" to accommodate a variety of interior layouts
- **Quick and easy Installation** – Simply bolt the poles included on the ArmorBoss Bus Sneeze Guard to the floor and ceiling of the bus for sturdy driver/passenger protection
- **Available in two models** –
ABB-TYPE A (23.5" width x 31.5" height)
Designed to fit: Type A ("smaller") school buses,
Type B school buses

ABB-TYPE C (31.5" width x 40" height)
Designed to fit: Type C ("traditional" / "conventional") school buses, Type D ("transit-style") school buses, people mover buses
